

Frontend Developer with 4 years of experience delivering production-ready web applications used by 5000+ users. Specialized in React, Next.js, and Angular — building complete UIs from scratch, often without a dedicated designer. Strong focus on performance optimization, scalable component architecture, and clean API integration.

SKILLS

Frontend Technologies	React, Next.js, Angular, JavaScript, Typescript, jQuery
UI Libraries	React Material UI, Angular Material, Bootstrap, Tailwind CSS, Flex-box
API Integration	Axios, REST APIs
Styling	HTML, CSS, SASS, SCSS
Performance	Lazy Loading, Code Splitting, Memoization
Design Tools	Figma, PhotoPea, Canvas
Version Control	Git, GitHub, Bitbucket, Azure

WORK EXPERIENCE

Frontend Developer03/2025 — Present

Boston Institute of Analytics

- Built a Student Management Portal from scratch, currently serving 5000+ users across Student, Admin, and Academic roles.
- Implemented role-based access control with protected routes and authentication covering 3 user types — ensuring secure, role-specific experiences.
- Delivered production features including pagination, skeleton loaders, file uploads, and rich text editors (Tiptap, Monaco) with Formik/Yup validation and Axios API integration.
- Managed state using Redux Toolkit and local state strategically, avoiding unnecessary re-renders and keeping data flow clean.
- Improved overall workflow efficiency by 30% through optimized component architecture, smart state management, and reusable UI patterns.

Software Developer09/2024 — 03/2025

Idealake Information Technologies Pvt. Ltd

- Contributed to Tamarind Astra from scratch — built 30+ pages including authentication flows (sign-in, sign-up, forgot/reset password) and complex multi-form modules.
- Built a custom Material UI theme from scratch, ensuring consistent design language across the entire application.
- Handled large-scale form management using Formik and Yup across 30+ pages, covering validation, error states, and clean data submission flows.
- Collaborated with backend and design teams to integrate APIs and deliver a scalable, maintainable frontend architecture.

Frontend Developer04/2022 — 08/2024

Ebrandz LLP

- Built the complete Angular UI from scratch — designed a modular component library that reduced dev time and made the codebase easy to scale and maintain.
- Developed multiple UI pages using Angular, TypeScript, SCSS, Flex, and Grid ensuring cross-browser compatibility.
- Improved app performance through lazy loading, optimized change detection, memoization, and route-level code splitting.
- Integrated CDN-based image optimization, cutting load times significantly for 1000+ users.

KEY DELIVERABLE / ACHIEVEMENTS

- Delivered complete UI for 3 major production apps **from scratch**, independently handling design decisions without a dedicated designer.
- Reduced UI bugs by 35% through optimized component architecture and improved state management.
- Built and shipped a Student Management Portal serving 5000+ users with role-based access across 3 user types.
- Handled 30+ complex form-heavy pages using Formik and Yup at Idealake, ensuring clean validation and error handling at scale.
- Integrated CDN-based image optimization at Ebrandz, significantly reducing load times for 1000+ users.
- Implemented performance optimizations including lazy loading, memoization, and code splitting across multiple projects.

EDUCATION

Bachelor of Science in Information Technology, Niranjana College of Commerce	05/2019
Higher Secondary Certificate (HSC), Sanskardham Junior College of Science	04/2016
Secondary School Certificate (SSC), Saroja Devi School	03/2014
