Frontend Developer with 3.5 years of experience building responsive, user-friendly web applications using React, Next.js, and Angular. Skilled in creating clean UI from scratch, optimizing performance, and integrating APIs. Experienced in component architecture, reusable UI design, and delivering scalable, maintainable applications.

## WORK EXPERIENCE

**Frontend Developer** 03/2025 – Present

*Boston Institute of Analytics* – Senior Developer

- Developed large-scale applications including a Student Management Portal (React) and an HR Agent Platform (Next.js), handling end-to-end UI/UX and front-end implementation.
- Designed and built the complete UI independently, ensuring clean, responsive, and user-centric interfaces.
- Integrated backend services using Axios and Redux Toolkit, enabling predictable state management and seamless data flow.
- Implemented major features such as pagination, skeleton loaders, Tiptap editor, Monaco editor, file attachment system, and Formik + Yup validations.
- Delivered scalable, maintainable codebases with modular architecture, reusable components, and clean folder structures.
- Built multi-role access systems (Student, Admin, Academic) with proper routing, protected routes, and authentication.
- Delivered a modular, maintainable codebase using reusable components and clean folder structure

**Software Developer** 09/2024 – 03/2025

*Idealake Information Technologies Pvt. Ltd.*

- Develop dynamic web applications using React and integrate APIs.
- Writing scalable, reusable code and collaborating with cross-functional teams.
- Utilizing tools like Redux, Material, TailwindCSS to enhance performance and maintainability.
- Working on React-based projects for frontend development, integrating Redux and Context API for state management.

**Frontend Developer** 04/2022 – 08/2024

*Ebrandz LLP.*

- Built the entire Angular application UI from scratch with clean, responsive layouts and reusable components.
- Created multiple UI pages using Angular, TypeScript, SCSS, Flex, and Grid, ensuring everything worked smoothly across different browsers and screen sizes.
- Improved app performance using techniques like lazy loading, better change detection, memoization, and route-level code splitting.
- Designed a clean component structure with reusable UI elements, which made development faster and easier to maintain.
- Write readable, scalable code by following proper best practices, clean folder structures, and regular code reviews.

## KEY DELIVERABLES / ACHIEVEMENTS

- Delivered complete UI for three major products **from scratch**, without a dedicated designer.
- Built a production-ready, scalable architecture using reusable components and optimized API handling.
- Improved application performance by using memoization, code-splitting, and efficient state management.
- Successfully implemented a role-based access system covering 3+ user types.
- Ensured smooth user experience using loaders, error states, form validation, and responsive design.
- Customized Angular Material components using SCSS, theming, and CSS overrides to achieve a unique, product-specific UI.

## SKILLS

- **Frontend Technologies** : React, Next.js, Angular, JavaScript, TypeScript, jQuery
- **UI Libraries** : React Material UI, Angular Material, Bootstrap, Tailwind CSS, Flex-box
- **Styling** : HTML, CSS, SASS, SCSS
- **Design Tools** : Figma, PhotoPea, Canvas
- **Version Control** : Git, GitHub, Bitbucket, Azure

## EDUCATION

**Bachelor of Science in Information Technology** 2016 – 2019

Niranjana Majithia College of Commerce

CGPA: 7.5
